World Book Day

On Thursday we celebrated World Book Day with the launch of a competition for each phase group. The winners will be announced next week and prizes will be awarded.

Tortoise's Dream

Purple Class enjoyed listening to the story, 'Tortoise's Dream' very much. We liked all the animal puppets and whilst Priscilla and Amber played the drums, we chanted 'Omumba Rombongo'!

We enjoyed the story so much, that we have made our own class book about 'Tortoise's Dream'. Please feel free to come to Purple Class and see our book.

London Zoo

Year 6 went on a trip to London Zoo which links to this half term's topic on Animal Kingdoms. Whilst there, each class attended an educational workshop about endangered species. Here, the children learnt many facts and reasons as to why some animals are close to extinction. The children were able to visit the zoo's new penguin beach and saw many of their favourite animals throughout the day. Everyone thoroughly enjoyed it.

Year 5 Bradford Telescopic Project (BRT)

Children in Year 5 are taking part in the BRT project which is a new science project being introduced to schools in Enfield. The children have access to BRT website with their own account and password. This allows them to instruct the Telescope to take pictures of stars, planets and constellations in space. They then process their pictures and save them into their very own space book.

"I thoroughly enjoy the fact that you can tell the telescope to take whatever picture you want, it's great!" said one pupil in Class 5G.

Prince of Wales Primary School

The project is for four weeks initially whereby children complete mission activities each with a video clip to assist them with answers to questions. We have the site licence for one year.

At the end of the four week telescope project, a few children will be selected to showcase all their work at a 'Presentation evening' – on 20th March at the Imperial College, London. Their parents are also invited to come along.

Here are two images requested by a pupil from the telescope:

Pinwheel Galaxy

The Crab Nebula
