

How to keep safer online:

Home learning emails are safe. However, when online remember to:

- **S** — Safe: Keep safe by not giving out your personal information when chatting on line e.g. name, address, which school you go to
- **M** — Meeting someone on line can be dangerous. Only do so if your parents / carers can be present. Remember someone you talk to on line, even for a while is still a stranger.
- **A** — Accepting emails, opening messages from strangers may contain viruses or nasty messages.
- **R** — Reliable: someone on line may lie about who they are or information may not be correct. Always check the facts in a book or with an adult.
- **T** — Tell a parent / carer / adult if something on line makes you feel uncomfortable
