

Wednesday 1.4.20 - Maths

Here is a set of 20 squares around a shaded space.

What is the area of the shaded space?

LO I can estimate the area of irregular shapes.

Activity

Imagine 3 different outdoor shapes at school. These could be the quad, a netball court or a flower bed.

For each, estimate the length and width and multiply to get the area.

**Have a go at these in
your book**

Next Step.

If a shape has an area of 30cm^2 what
could the length and width be?

Next Step.

If a shape has an area of 55cm^2 what
could the length and width be?
