### Activity 1

Play shops with someone in your house. Give each item a price and then practice giving change to the person who buys it. (e.g. an apple is 20p. Mum buys 2 apples and pays with a 50p coin. How much change will she get?)

**In books**, record how much will you get if you pay for each item with a 50p coin?

You can use the hundred square to help you. You find your number e.g. 43 and count forward to 50.

e.g.  $50p - 43p = 7p$

### Activity 2

Choose a number between 10 and 50. Draw a bar model and write 2 addition and two subtraction number sentences for each.

e.g. I choose number 12.

$3 + 9 = 12$

$12 - 9 = 3$

$9 + 3 = 12$

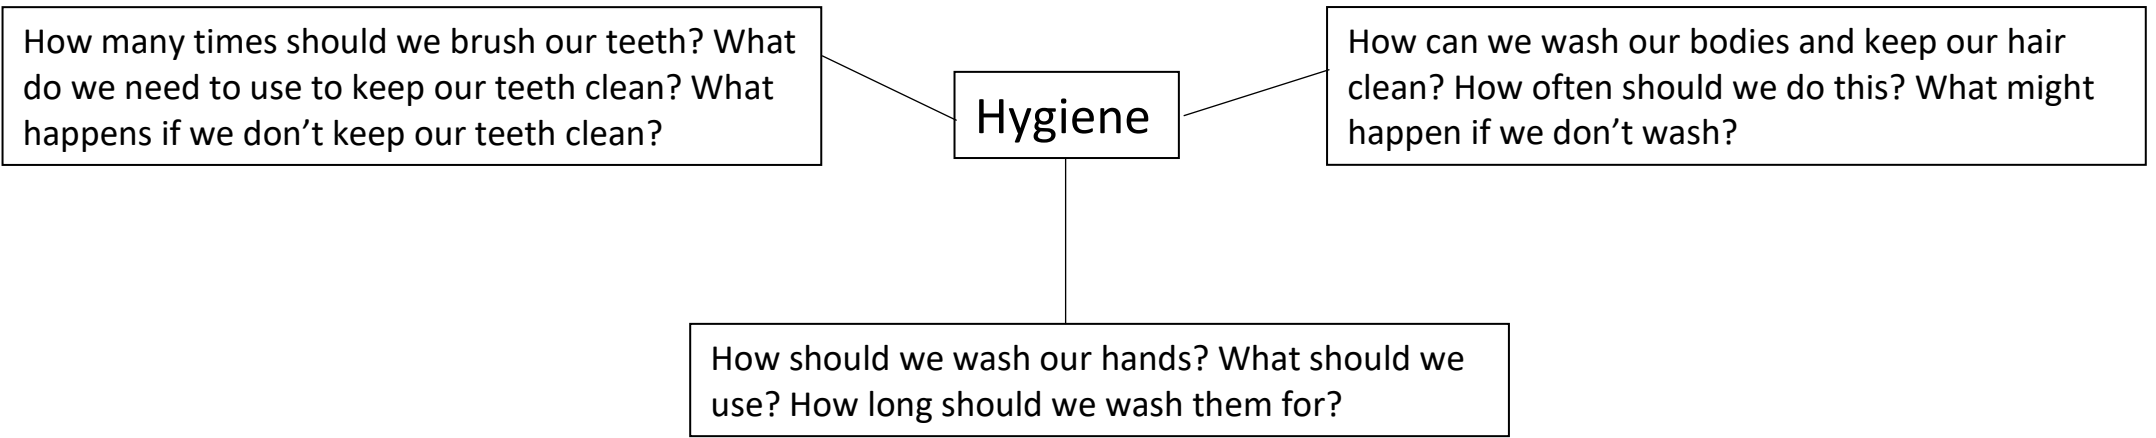

$12 - 3 = 9$

### Challenge

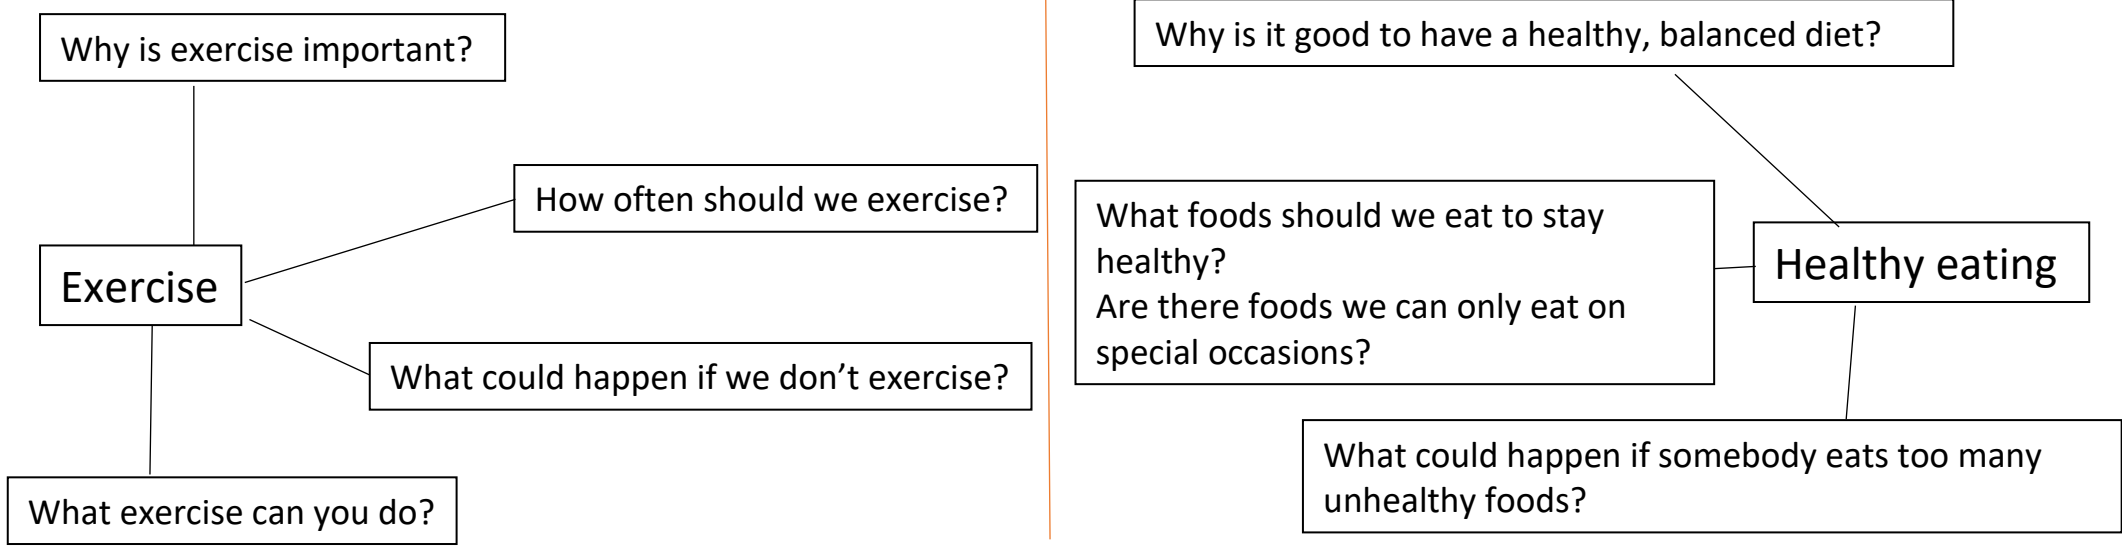

Choose a number between 60 and 100  
You find your number e.g. 65 and count backwards until you get to 50.

e.g.  $65p - 15p = 50p$

You can use the hundred square to help you.
