

$$10 \div 3 = 3 \text{ r } 1 = 3 \frac{1}{3}$$

shared out

remainder

thirds

$$10 \div 4 = 2 \text{ r } 2 = 2\frac{2}{4} = 2\frac{1}{2}$$

$$10 \div 3 = 3 \frac{1}{3}$$

$$10 \div 4 = 2 \frac{2}{4} = 2 \frac{1}{2}$$

The remainder can be written as the numerator.

The divisor can be written as the denominator.

Simplify the fraction if you can.
