

Maths Mastery Home Learning Challenge

Adult Guidance

What Are We Learning?

We are learning to find the correct number to match a number of objects, up to 10.

How to Set up the Challenge

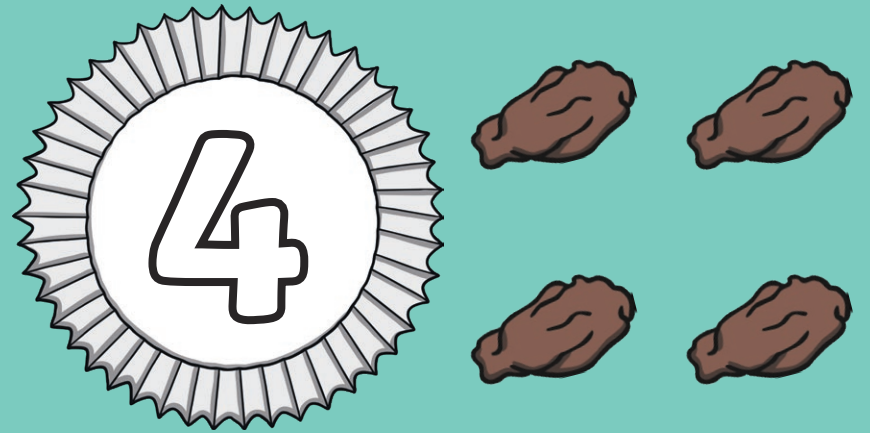

- Take ten paper cake cases and write numerals 1 to 10 in the bottom of the cases.
- Spread the cake cases out on the table.
- You will need some raisins for this activity. You will need to hand your child between one and ten raisins each time for them to place in the matching cake case.

How to Get Your Child Thinking

- Can you count the raisins? How many are there?
- Which numbered cake case matches this group of raisins?
- Which numbered cake case shows that number?
- Can you match the numbered cake case to the group of raisins?

Cake Case Number Matching

- Count the raisins. How many are there?
- Look for a cake case that shows that number.
- Place the raisins in the cake case with the matching number.
