

1. 254
2. 859
3. 984
4. 762
5. 937
6. 498

## Challenge 1

Jack has put 63  
in the wrong  
place value  
columns.

## Challenge 2

Both are correct  
because  
addition is  
commutative  
and the numbers  
can be added  
either way  
round.
