

# Shoe Size

A children's shoe shop took a survey of their customers shoe size over one day. Here is a list of their responses.

4            2            2            2            1            3            1  
 2            2            3            4            1            2            3  
 2            2            1            1            3            1            3  
 5            1            2            3            4            2            1

Copy this Tally Chart into your jotter and use the list above to complete it.

Shoe Size	TALLY	TOTAL
Size 1	HHH III	8
Size 2	HHH HHH	10
Size 3	HHH I	6
Size 4	III	3
Size 5	I	1

Then use the information in the tally chart to answer the questions below in your jotters.

- 1) Which shoe size was most popular? Size 2.
- 2) Which shoe size was the least popular? Size 5.
- 3) What was the largest shoe size? Size 5.
- 4) What was the smallest shoe size? Size 1.
- 5) How many more children had size 2 shoes than had size 4 shoes? 7.
- 6) How many fewer children had size 5 shoes than size 1 shoes? 7.
- 7) How many customers did the shop have on the day of the survey? 28.
- 8) Order the shoe sizes from most popular to least popular? Size 2, Size 1, Size 3,  
Size 4, Size 5
