Classification

Recap:

What is classification?

Mini-beasts:

https://www.bbc.co.uk/bitesize/topics/z6882hv/articles/9fkwmn

Starter:

Create a mind map on different ways to group things.

E.g. colour, shape.

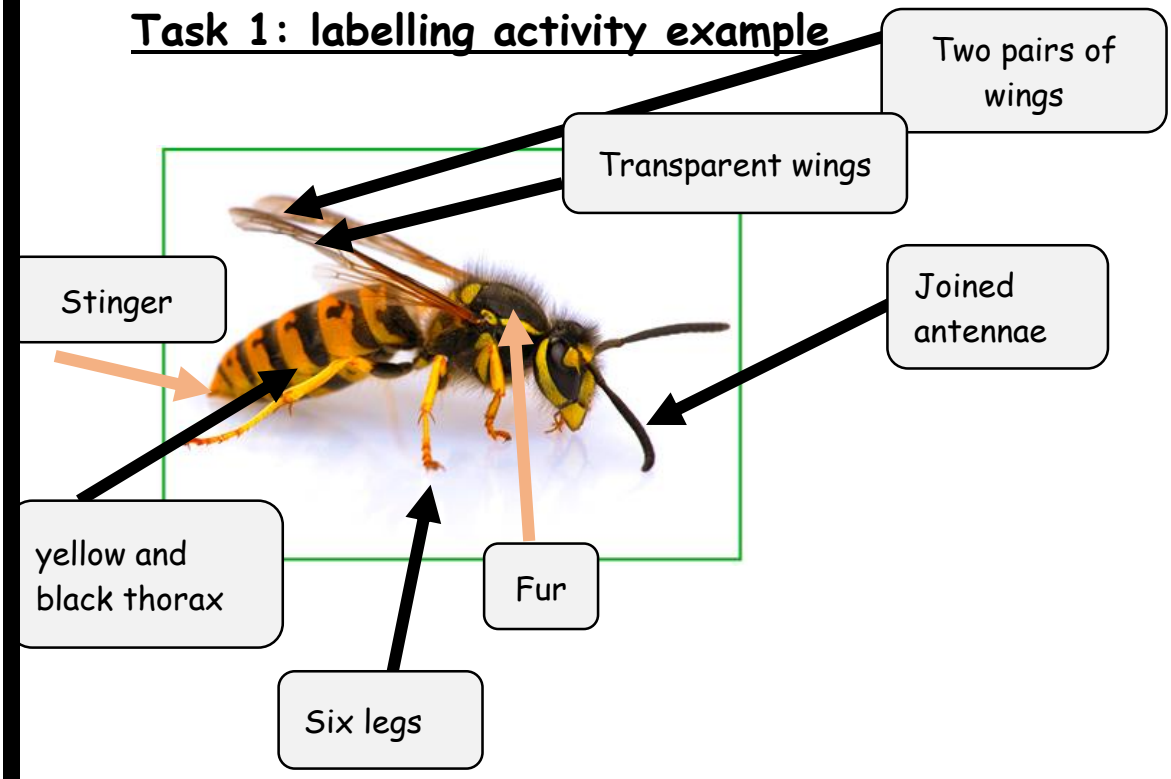
Task:

Visit a local water habitat area (river, lake, pond). If this is not possible, use open spaces (garden, parks) to look at different mini- beasts around. Collect, observe and identify animals that are living in the habitat.

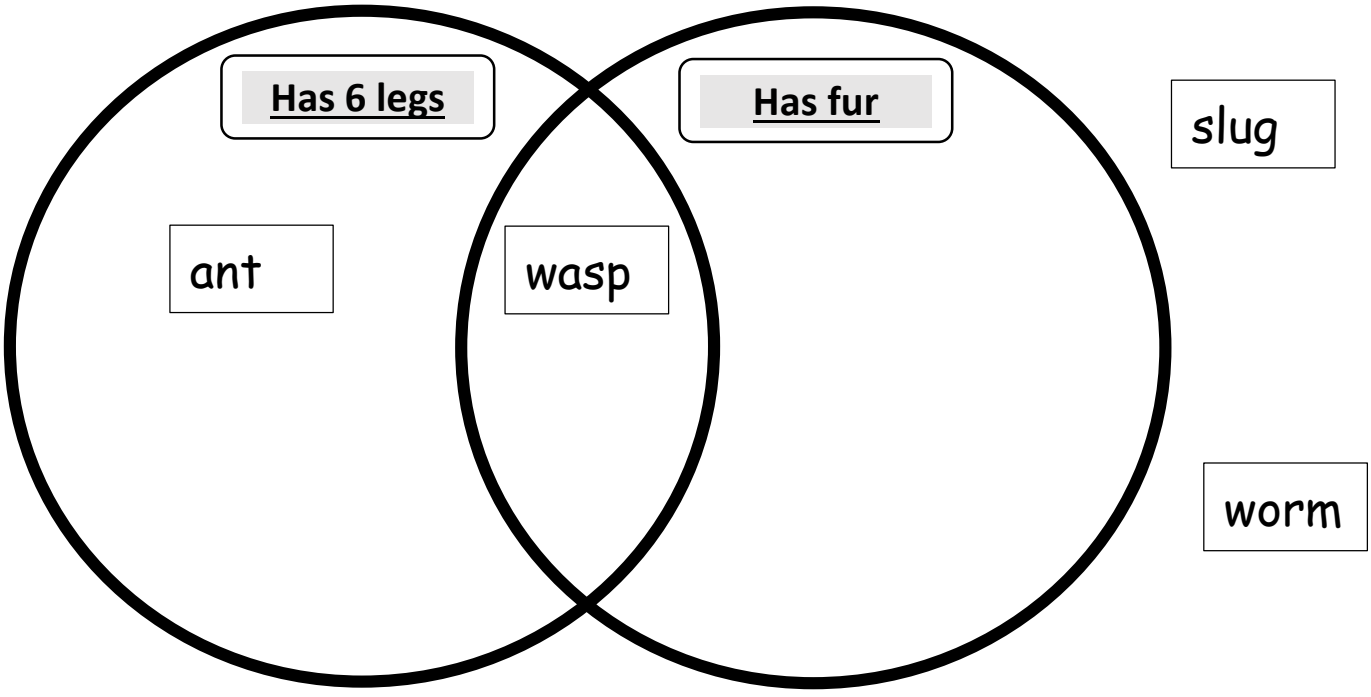
1. Draw or take pictures of the animals and make labels of some of their characteristics.
2. Create a Venn diagram and organise the animals. You can use your own labels/headings.
3. Create a key for a mini-beasts you have found.

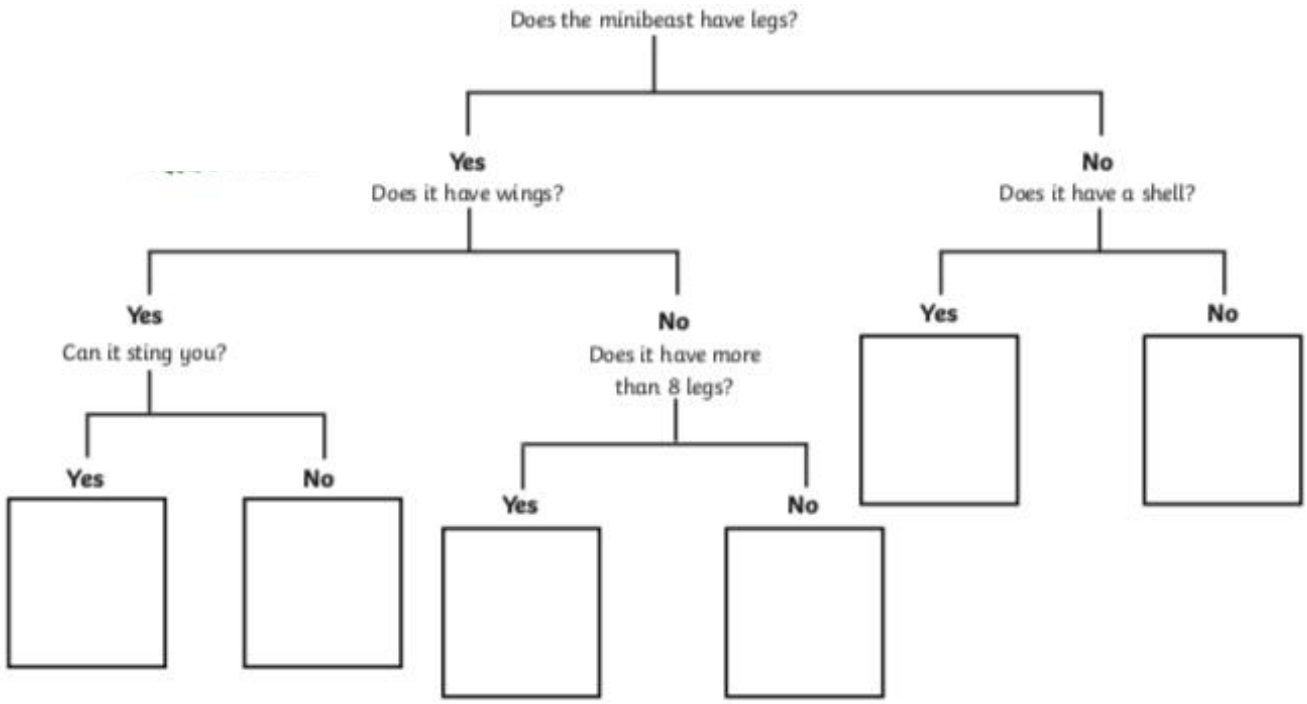
Examples of the work will be listed below.

Task 1: labelling activity example



Task 2: Venn diagram example





Task 3: mini-beast classification example
