

Thursday 11th June

I can find less by taking away 1, 10 and 100

$$214 - 1 = 213$$

$$214 - 10 = 204$$

$$214 - 100 = 114$$

Which number changed for each when I took away?

Why?

Discuss with an adult.

Now try the work sheet finding 1 less, 10 less and 100 less.

Challenge

Then try the challenge. Are the statements true or false? You need to work each statement to give you the correct answer.
