

How to Plant a Bean Seed

Do you know how Jack grew his magic beans? Just follow these instructions, and you may soon be climbing to the Giant's house up your own beanstalk!

Equipment

- bean seeds
- small pot
- soil
- spoon
- ice pole stick or sticky label
- pen
- watering bottle

Method

- First, gather all your equipment together and write your name on the sticky label or ice pole stick.
- Next, spoon some soil into the pot.
- When the pot is full, use the pen to make a hole in the soil about 3cm deep.
- Drop the bean seed into the hole carefully.
- With your fingers, brush the soil back over the seed.
- Very gently, press down on the surface of the soil.
- Push the ice pole stick down the inside of the pot or stick the label on the outside.
- Sprinkle enough water over the soil to make it damp but do not overwater the seed.
- Put your pot in a warm place.
- Wash your hands thoroughly.

Now all you're waiting for is to see your beanstalk start to grow!
