

Wednesday 1st July

I can subtract using the expanded columnar method.

Have a go at partitioning these numbers into hundreds, tens and ones.

456

345

120

Here are your answers

$$400 + 50 + 6$$

$$300 + 40 + 5$$

$$100 + 20 + 0$$

Well done!

Look at this video which shows how to use the expanded method for subtraction.

<https://www.youtube.com/watch?v=Wd9qrr-3PVs>

Now explain the steps taken to an adult or friend.

I have partitioned the numbers for you.

Can you subtract?

$$347 - 212 =$$

$$300 + 40 + 7$$

$$\underline{-200 + 10 + 2}$$

Now try this subtraction sum on your own using the expanded columnar method

$$697 - 354 =$$

Use the expanded columnar method to subtract on the worksheet.

Then have a go at the challenges.
