

Friday 10<sup>th</sup> July

I can experiment with paper.

How is paper made?

<https://www.bbc.co.uk/teach/class-clips-video/primary-science-how-paper-is-made/zryb92p>

Why is it important to recycle paper?

<https://www.youtube.com/watch?v=jAqVxsEgWIM>

If you're not finished with your plastic product, please continue to do so.

If you are finished, have a go at these paper challenges.

I've given you three fun challenges using recycled paper. Choose a couple and have fun with them!

### Tallest Tower

How can you make the tallest free standing tower from just one piece of recycled A4 paper?

You can use a pair of scissors, but no glue or tape is allowed.

## Fun with flight

Design and make a paper aeroplane (using recycled paper) that will travel the furthest.

Does changing your design make it go further?

Use this clip to make a paper hedgehog

## Question to Ponder

Which of these activities can you link with Science?  
Why?
