

Thursday 2<sup>nd</sup> July

I can subtract using the expanded columnar method.

You are going to continue to use the expanded columnar method to subtract.

Look at this calculation using the method.  
Can you spot the mistake Jack has made?  
Once you've spotted it, explain it to an adult.

$$346 - 32 =$$

H		T		O
300	+	40	+	6
<u>- 300</u>	+	0	+	2

Now use the expanded method to solve this.  
Put the method in the build it and draw it column.  
Then write a word problem using the numbers.  
Finally explain the answer to the word problem.

<p><b>Calculate it</b></p> <table border="1" data-bbox="195 618 568 901"><tr><td></td><td>7</td><td>9</td><td>3</td></tr><tr><td>-</td><td></td><td>7</td><td>0</td></tr><tr><td colspan="4"><hr/></td></tr><tr><td></td><td></td><td></td><td></td></tr></table>		7	9	3	-		7	0	<hr/>								<p><b>Build it and draw it</b></p>
	7	9	3														
-		7	0														
<hr/>																	
<p><b>Write a sensible word problem</b></p>	<p><b>Explain it</b></p>																

You are now going to have a go at some word problems involving subtraction.

Don't forget to use the methods you've been taught.

Remember also the place value of the numbers.
