

Tuesday 14th July

I can halve 2 digit numbers.

Practise halving numbers to 20

<https://www.topmarks.co.uk/maths-games/hit-the-button>

How can you halve 48?

Have go at your own strategies. You can use manipulatives to help you.

On the next page there is a method that will help.

Write the number
at the top

48

Partition it

40

8

Halve it

20

4

Recombine it

24

Try these...

22

42

28

16

24

26

62

When the number of tens is odd, you have two choices:

Either

You need to know the halves of 30, 50, 70, 90 and so on...

Or

You can apply a little trick...

Write the number
at the top

38

(If you know the
halves of 'odd
tens'.)

Partition it

30

8

Halve it

15

4

Recombine it

19

Write the number
at the top

38

Partition
it into
even tens
and the
rest.

20

18

Halve it

10

9

Recombine it

19

Try these...

58

36

72

54

34

56
