

Wednesday 8th July

I can design a plastic product using recycled plastic.

Which came first?

Arrange these products into the order you think they were invented in...

Lego bricks
I love NY t-shirt
Barcode
Matches (friction)
Chupa Chups lollies
Guitar pick

Look at these pictures of plastic packing. How are there designs suited for the purpose? Why? Discuss with an adult.

Look at these pictures of how you can recycle plastic to make new things.

You now need to design your new product made from recycled plastic.

You can use the pictures as inspiration or if you have your own ideas of what you'd like to make.

When you design, think about:

- Who is the product for
- What is the product going to be used for

Question to ponder.

Is plastic good for the environment?
Why not?
