

1  $3 \cdot 8 \times 100 \div 1000 =$

2  $5 \cdot 9 \div 10 \times 1000 =$

Solve these additions.

3 
$$\begin{array}{r} 36285 \\ + 17688 \\ \hline \end{array}$$

4 
$$\begin{array}{r} 17 \cdot 96 \\ + 24 \cdot 77 \\ \hline \end{array}$$

- 5 Find the total of **0·87**, **11·6** and **19·48**.  
Use the space below to set out your work.

Write in the missing numbers.

6  $(56 \div \square) \times 6 = 42$

7  $(4 \times 9) \div \square = 6$

Solve these subtractions.

8 
$$\begin{array}{r} 45362 \\ - 28728 \\ \hline \end{array}$$

9 
$$\begin{array}{r} 430.26 \\ - 214.83 \\ \hline \end{array}$$

10 Lay out and solve:  $2816 \times 18 = \square$
